

## [HEC24010](#) Investigating and analysing the usage, perceptions, enablers and barriers to using a taxonomy in Australian sports dietitians.

Researchers at La Trobe University are seeking volunteer research participants to be involved in a study about the usage, knowledge, perceptions, and enablers and barriers to utilizing a taxonomy in both sports dietetics and other health professions. It is hoped that results from this project can be used to improve the consistency and quality of sports dietetic consultations and help advocate the role of a sports dietitian, potentially leading to increased employment stability.

### You May Qualify if You

- Are a sports dietitian and a member of Sports Dietitians Australia (SDA).

### Participation involves

If you decide to take part in the research, you would be asked to:

- Answer a survey investigating the current usage of the Nutrition Care Process Terminology (NCPT) or other taxonomy and the perceptions, enablers and barriers to using a taxonomy.

Your decision to participate in research is voluntary.

### Reimbursement for participation

There are no additional costs associated with participation in this research study, nor will you or the participant be paid.

### For More Information

If you would like more information or are interested in being part of the study, please contact:
